

Free **STEM Workshops** on
**Climate Change
and Water Pollution**
Students and teachers are invited.

Students in grades 5-9 and their teachers will learn how STEM is positively impacting the environment when it comes to climate change and water pollution. Join us during April—June to explore how professionals working in STEM are making an impact—and cool careers that students can explore to make a difference, too.

These free programs include:

- In-person and virtual student workshops
 - Artificial Intelligence (AI) simulation
 - Spread the word through coding
- Act 48 workshop for teachers
- Q&A time with STEM faculty and/or industry professionals

Students grades 5-9 and teachers!
